Highlights

1997 to 2001 Trends

- Work absences due to personal reasons (own illness or disability; personal or family responsibilities, excluding maternity leave) and the resulting time lost increased steadily between 1997 and 2001 (following the 1997 LFS redesign), but the jumps in 2001 were quite large. For example, in that year, an estimated 7.0% (700,000) of full-time employees were absent from work for all or part of any given week because of personal reasons—up considerably from 6.3% in 2000, and 5.5% in 1997.
- As a result of these absences, approximately 3.4% of usual weekly work time was lost (inactivity rate) in 2001, higher than the 3.2% and 3.0% in 2000 and 1997 respectively. This translates into an average of 8.5 days for each full-time employee, about half a day more than a year earlier, and a little over a full day more than the 7.4 days five years earlier.
- In total, approximately 85.2 million workdays were lost due to personal reasons in 2001, up from 78.6 million in 2000 and 65.6 million in 1997.
- Average workdays lost per full-time worker on account of own illness or disability rose over the five- year period (from 6.2 days in 1997 to 7.0 days in 2001) as did those due to personal and family responsibilities (from 1.2 days to 1.5 days).
- Work absences and average days lost per year for personal reasons registered upward trends for both men and women. For men, the incidence rose from 4.6% in 1997 to 6.1% in 2001, and days lost increased from 6.3 to 7.6. For women, the incidence climbed from 6.7% to 8.2%, while days lost rose from 9.1 to 9.7.
- The increase in lost workdays was widespread. Workers in both the public and private sectors, in permanent and non-permanent jobs, in unionized and non-unionized positions, in most provinces, and in most industry and occupation groups recorded rising trends over the period. However, workers in a few industries such as transportation

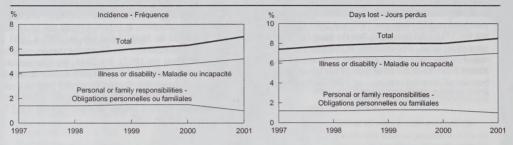

Faits saillants

Les tendances de 1997 à 2001

- Les absences du travail pour des raisons personnelles (pour cause de maladie ou d'incapacité ou en raison d'obligations personnelles ou familiales excluant les congés de maternité), et le temps perdu qui en est résulté ont augmenté de façon constante de 1997 à 2001 (à la suite du remaniement de l'Enquête sur la population active effectué en 1997). En 2001, les hausses ont été assez fortes. Environ 7,0 % (700 000) de tous les employés à temps plein ont été absents du travail pour des raisons personnelles durant une partie ou la totalité d'une semaine quelconque, en forte hausse comparativement à 6,3 % en 2000 et à 5.5 % en 1997.
- Ces absences ont donné lieu à une perte d'environ 3,4 % du temps normal de travail par semaine (taux d'inactivité) en 2001, en hausse par rapport à 3,2 % en 2000 et à 3,0 % en 1997. Cette augmentation se traduit par une moyenne de 8,5 jours par employé à temps plein, un chiffre supérieur de près d'une demi-journée à celui de 2000 et d'un peu plus d'une journée à celui de 7,4 jours enregistré en 1997.
- Au total, environ 85,2 millions de jours de travail ont été perdus en 2001 pour des raisons personnelles, en hausse comparativement à 78,6 millions en 2000 et à 65,6 millions en 1997.
- Le nombre moyen de jours de travail perdus chez les travailleurs à temps plein pour cause de maladie ou d'incapacité a augmenté au cours de la période allant de 1997 à 2001, étant passé de 6,2 jours en 1997 à 7,0 jours en 2001. Le nombre moyen de jours perdus en raison d'obligations personnelles ou familiales a également connu une hausse (1,2 jour en 1997 contre 1,5 jour en 2001).
- Les absences et le nombre moyen de jours de travail perdus par année pour des raisons personnelles ont suivi une tendance à la hausse, tant chez les hommes que chez les femmes. Pour les hommes, la fréquence des absences est passée de 4,6 % en 1997 à 6,1 % en 2001 et le nombre de jours de travail perdus par année, de 6,3 à 7,6. Pour les femmes, la fréquence des absences a grimpé de 6,7 % à 8,2 %, alors que le nombre de jours perdus par année est passé de 9,1 à 9,7.
- L'augmentation des jours de travail perdus a été généralisée. Les travailleurs des secteurs public et privé, qu'ils aient été permanents ou non, syndiqués ou pas, ont affiché des tendances à la hausse de 1997 à 2001 dans la plupart des provinces, des secteurs et des groupes de professions. Toutefois, les travailleurs de certains secteurs (par exemple, ceux du secteur du transport et de

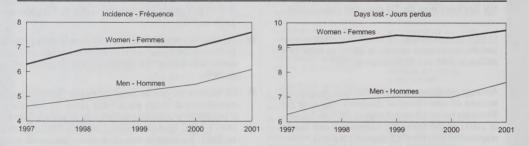

The incidence of work absences due to personal reasons and the resulting days lost increased steadily between 1997 and 2001.

La fréquence des absences du travail pour des motifs personnels et les jours de travail ainsi perdus ont augmenté de façon constante de 1997 à 2001.

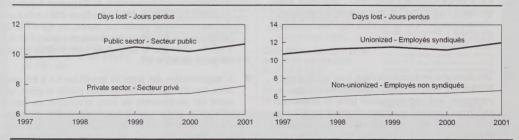

Though work absence incidences and days lost are generally higher for women than men, the gaps have narrowed slightly.

Bien que la fréquence des absences du travail et le nombre de jours de travail perdus soient généralement plus élevés chez les femmes que chez les hommes, les écarts se sont légèrement rétrécis.

Work days lost in the public sector have remained higher than for employees in the private sector, as have those of unionized workers vis-à-vis the non-unionized.

Le nombre de jours de travail perdus dans le secteur public est demeuré plus élevé que celui des employés du secteur privé, tout comme celui des employés syndiqués comparativement à celui des employés non syndiqués.

Source: Labour Force Survey - Enquête sur la population active

and warehousing, accommodation and food, and education; and in a few occupations such as management, administration, health, teachers and professors and protective services saw little change.

2001 Variations

- As in previous years, absence levels in 2001 varied by demographic group, industry, occupation, and province. Several interrelated factors account for the differences. These include family circumstances, especially the presence of preschool-aged children; physical health of the worker, which is frequently related to age; work environment; job stress; employer-employee relations; union coverage; and work schedules.
- The presence of preschool-aged children (under 5 years) plays a large part in work absences for personal or family responsibilities, especially for women. In families with preschoolers, women lost 4.5 days for this reason, a day and a half more than men (2.9) in similar circumstances.
- Workdays lost for both men and women generally tended to increase with age. In 2001, for both sexes combined, youths (15 to 24 years) averaged approximately 6.8 days, compared with 11.2 for workers aged 55 to 64. The difference can be attributed mainly to illness or disability. Days lost due to personal or family responsibilities remained steady at a little over one day per employee for most age groups, with the notable exception of women in their prime childbearing years (25 to 44) where the level was higher (around 2 days).
- Full-time workers in the health care and social assistance industry (12.8 days) lost the most time in 2001, followed by those in public administration (10.1) and in transportation and warehousing (10.0). Those who lost the least were in professional, scientific and technical industries (5.0).
- Physically demanding, hazardous or stressful occupations showed the most time lost. Workers in health occupations lost 13.0 days, and transportation equipment operators lost 11.0 days. In contrast, managers and employees in wholesale trade positions lost the least time (under 5 days).

l'entreposage, du secteur de l'hébergement et de la restauration et de celui de l'enseignement) et de certaines professions (par exemple, celles liées à la gestion, à l'administration, à la santé, à l'enseignement et aux services de protection) ont connu peu de changements.

Les variations en 2001

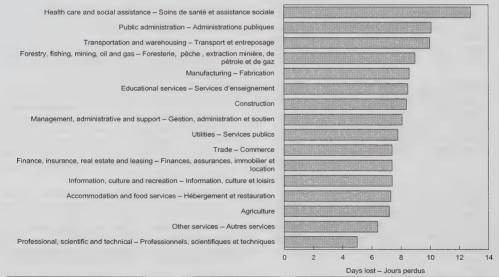

- Tout comme lors des années précédentes, le taux d'absence en 2001 a varié selon le groupe démographique, le secteur d'activité, la profession et la province. Quelques facteurs secondaires expliquaient les différences. Ces facteurs comprenaient la situation familiale, surtout la présence d'enfants d'âge préscolaire, la santé physique du travailleur, qui est souvent liée à l'âge, le milieu de travail, le stress, les relations entre l'employeur et l'employé, l'appartenance syndicale et les horaires de travail.
- La présence d'enfants d'âge préscolaire (âgés de moins de cinq ans) entre pour beaucoup dans le nombre d'absences du travail pour cause d'obligations personnelles ou familiales, surtout chez les femmes. Dans les familles comptant des enfants d'âge préscolaire, les travailleuses ont perdu 4,5 jours pour cette raison, soit un jour et demi de plus que le nombre enregistré chez les hommes (2,9 jours) dans des circonstances similaires.
- Le nombre de jours de travail perdus tant chez les femmes que chez les hommes tend généralement à augmenter avec l'âge. En 2001, pour les deux sexes, la moyenne était d'environ 6,8 jours dans le cas des jeunes (15 à 24 ans) et de 11,2 jours chez les travailleurs âgés de 55 à 64 ans. La différence peut être principalement attribuable à la maladie ou à l'incapacité. Le nombre de jours de travail perdus en raison d'obligations personnelles ou familiales est demeuré stable, soit d'un peu plus d'une journée par travailleur pour la plupart des groupes d'âge, à l'exception bien entendu des femmes en âge de procréer (25 à 44 ans) pour lesquelles la moyenne était plus élevée (environ 2 jours de travail).
- Les employés à temps plein du secteur de la santé et de l'assistance sociale (12,8 jours) sont ceux qui ont perdu le plus de temps en 2001, suivis des employés du secteur des administrations publiques (10,1 jours) et de ceux du secteur du transport et de l'entreposage (10,0 jours). À l'opposé, c'est dans le secteur des services professionnels, scientifiques et techniques que les employés ont perdu le moins de temps (5,0 jours).
- Les employés dont la profession est exigeante physiquement, dangereuse ou stressante sont ceux qui ont perdu le plus de temps en 2001. Les travailleurs du secteur de la santé ont perdu 13,0 jours et les opérateurs de matériel de transport, 11,0 jours. À l'opposé, les gérants et les employés du secteur du commerce de gros ont connu la perte la plus faible (moins de 5 jours).

- Full-time workers covered by a union contract missed almost twice as many days as their non-unionized counterparts (12.0 versus 6.7). This is not surprising, since most if not all collective agreements include paid sick leave entitlements.
- More than the average number of days (8.5) were lost by workers in New Brunswick (10.1), Saskatchewan (10.0), Nova Scotia and British Columbia (9.6 each), Manitoba (9.3), and Quebec (9.0). Newfoundland and Labrador with 8.6 days almost matched the national average, while Alberta (8.1), and Ontario and Prince Edward Island (7.6 each), fell below.
- Employees in permanent positions lost more time (8.6 days) than those in non-permanent jobs (7.5 days).
- Full-time workers in the public sector missed almost three days more than their counterparts in the private sector (10.7 versus 7.9). Most of the difference was due to illness or disability.

- Les travailleurs à temps plein qui sont syndiqués ont perdu près de deux fois plus de jours que leurs homologues non syndiqués (12,0 jours contre 6,7 jours). Rien d'étonnant à cela, puisque la plupart, voire la totalité, des conventions collectives prévoient le droit à des congés de maladie payés.
- Les travailleurs du Nouveau-Brunswick (10,1 jours), de la Saskatchewan (10,0 jours), de la Nouvelle-Écosse et de la Colombie-Britannique (9,6 jours chacune), du Manitoba (9,3 jours) et du Québec (9,0 jours) ont perdu plus de jours de travail que la moyenne nationale (8,5 jours). Par contre, le nombre de jours de travail perdus par les travailleurs de Terre-Neuve-et-Labrador (8,6 jours) était très proche de la moyenne nationale, tandis que ceux des travailleurs de l'Alberta (8,1 jours) et de l'Ontario et de l'Île-du-Prince-Édouard (7,6 jours chacune) se situaient sous cette moyenne.
- Les employés qui occupaient des postes permanents ont perdu davantage de temps (8,6 jours) que les travailleurs non permanents (7,5 jours).
- Les employés à temps plein du secteur public ont perdu près de trois jours de travail de plus que leurs homologues du secteur privé (10,7 jours contre 7,9 jours). La différence était principalement attribuable à la maladie ou à l'incapacité.

In 2001, workers in the health care and social assistance industry lost the most work time for personal reasons.

En 2001, les employés du secteur des soins de santé et de l'assistance sociale sont ceux qui ont perdu le plus de temps de travail pour des motifs personnels.

Source: Labour Force Survey - Enquête sur la population active

Data source

This publication uses data from Statistics Canada's Labour Force Survey (LFS). The LFS is a monthly household survey that collects data on the labour market activities of working-age Canadians, namely, those 15 years or over. Excluded from the survey are persons living in Yukon, Nunavut and the Northwest Territories, persons living on Indian reserves, inmates of institutions, and full-time members of the Canadian Armed Forces.

The majority of LFS statistics refer to a particular week each month (the reference week). The data in this publication are based on the average of the 12 reference weeks of the year in question. Annual average data eliminate the effects of seasonal movements and, being based on larger samples, considerably reduce sampling error.

The statistical objective of the LFS from its inception has been to break the working-age population into three mutually exclusive classifications—employed, unemployed, and not in the labour force—and to provide descriptive and explanatory data on each category.

The 1997 LFS redesign allowed, for the first time, the exclusion of maternity leave, a major factor in time lost by women for personal or family responsibilities. The LFS enhancements also added more classification variables. It is now possible, for example, to estimate work absence rates by workplace size, union coverage and job permanency. (Note that any changes in a questionnaire may yield data that differ slightly from those of earlier years.)

Section A of this publication provides absence rates for 2001 by a variety of factors; maternity leave is excluded from the personal or family responsibilities code. Section B provides time series including maternity absences for the period from 1991 to 1997, and excluding maternity absences from 1997 to 2001. The illness or disability absence rates were not affected by the redesign, nor were the rates for men.

Absence rates including and excluding maternity leave are presented for 1997 to provide some rough measure of the impact of the questionnaire changes on the series (however, users are cautioned against using this rough measure as an adjustment factor for the pre-redesign series).

Source des données

L'Enquête sur la population active (EPA) de Statistique Canada constitue la source des données de la présente publication. L'EPA est une enquête mensuelle menée auprès des ménages dans le but de recueillir des données sur l'activité des Canadiens en âge de travailler, c'est-à-dire âgés de 15 ans et plus. Sont exclus de l'enquête les personnes qui vivent au Yukon, au Nunavut et dans les Territoires du Nord-Ouest, les personnes vivant dans les réserves indiennes, les pensionnaires d'établissements et les membres à temps plein des Forces armées canadiennes.

La plupart des statistiques de l'EPA renvoient à une semaine particulière d'un mois donné (semaine de référence). Les données de cette publication sont fondées sur la moyenne des 12 semaines de référence de l'année observée. Les moyennes annuelles suppriment les effets des mouvements saisonniers et, comme elles sont fondées sur de vastes échantillons, réduisent considérablement le taux d'erreur due à l'échantillonnage.

Depuis sa création, l'EPA a eu pour objectifs statistiques de répartir la population en âge de travailler en trois catégories mutuellement exclusives — les personnes occupées, les chômeurs et les inactifs — et de fournir des données descriptives et explicatives sur chacune de ces catégories.

Le remaniement de l'EPA en 1997 a permis pour la première fois l'exclusion du congé de maternité, un facteur important du temps perdu par les femmes en raison d'obligations personnelles ou familiales. Le remaniement de l'EPA a permis également d'identifier différentes variables. Il est maintenant possible, par exemple, d'estimer le taux d'absence selon la taille de l'établissement, l'appartenance syndicale et la permanence de l'emploi. (Notez que tout changement apporté à un questionnaire peut entraîner des données légèrement différentes de celles des années antérieures.)

La section A de la présente publication donne les taux d'absence pour 2001 selon plusieurs facteurs, sans tenir compte du congé de maternité dans le cas des absences liées au code « obligations personnelles ou familiales ». La section B offre des séries chronologiques pour la période allant de 1991 à 1997 incluant les congés de maternité et excluant les congés de maternité pour la période allant de 1997 à 2001. Les taux d'absence pour cause de maladie ou d'incapacité ainsi que les taux des hommes n'ont pas été touchés par le remaniement.

Les taux d'absence incluant et excluant les congés de maternité sont présentés pour 1997 afin de fournir une mesure grossière des répercussions des changements apportés au questionnaire sur les séries (les utilisateurs ne devraient toutefois pas utiliser cette mesure grossière comme un facteur de correction pour les séries d'avant le remaniement). For a fuller description of the LFS objectives, coverage, sampling techniques, concepts, definitions, and data quality, see *Historical Labour Force Statistics* (Catalogue no. 71-201-XPB) or visit the Internet at http://www.statcan.ca/english/freepub/71-543-GIE/0000071-543-GIE.pdf for the *Guide to the Labour Force Survey*.

Definitions

The population covered in this publication consists of full-time employees (30 hours or more per week) holding only one job.

Prior to the 1997 redesign, usual hours worked were the number of hours, paid or unpaid, usually worked by a full-time worker in a typical week. Beginning in 1997, usual hours refer to normal paid hours, not counting overtime. The effects of this change on absence rates are unclear.

For part-week absences, the respondent is asked to report the number of work hours missed; for full-week absences, hours missed are the usual hours worked. For workers with variable hours, the number of hours actually worked in the previous four weeks is averaged. Differences between this average and hours worked in the reference week attributable purely to work scheduling are not regarded as time lost or overtime.

Part-time workers, the self-employed and multiple jobholders are excluded from the data; definitions and reasons for the exclusion are as follows:

Part-time workers are employed persons who usually work less than 30 hours per week. Their work schedules generally provide them with more opportunity to attend to personal or family demands outside normal working hours than is the case for full-time workers. Also, events that would otherwise result in absences sometimes occur on days when the part-time worker is not scheduled to be at work. Not surprisingly, absence rates tend to be lower among part-time workers.

Pour obtenir une description plus détaillée des objectifs, du champ d'observation, des techniques d'échantillonnage, des concepts, des définitions et de la qualité des données de l'EPA, voir *Statistiques chronologiques sur la population active* (n° 71-201-XPB au catalogue) ou le *Guide de l'Enquête sur la population active* dans le site Web de Statistique Canada à l'adresse suivante : http://www.statcan.ca/francais/freepub/71-543-GIF/0000071-543-GIF.pdf.

Définitions

La population observée dans la présente publication est formée des **employés à temps plein** qui détiennent un seul emploi (30 heures ou plus par semaine).

Avant le remaniement de 1997, les heures habituelles de travail correspondaient au nombre d'heures habituellement travaillées par un travailleur à temps plein au cours d'une semaine normale, peu importe si elles étaient rémunérées ou non. Depuis 1997, les heures habituelles d'un employé correspondent à ses heures régulières rémunérées, exception faite des heures supplémentaires. Les effets de ces changements sur les taux d'absence sont incertains.

Aux personnes qui se sont absentées une partie de la semaine, on demande le nombre d'heures de travail perdues. Pour celles qui se sont absentées pendant toute la semaine, le nombre d'heures perdues équivaut au nombre d'heures habituellement travaillées. Chez les personnes qui ont un horaire de travail variable, les heures habituellement travaillées correspondent à la moyenne des heures effectivement travaillées au cours des quatre semaines précédentes. La différence entre cette moyenne et les heures travaillées au cours de la semaine de référence attribuable uniquement à l'horaire de travail n'est pas considérée comme du temps perdu ou du temps supplémentaire.

Les travailleurs à temps partiel, les travailleurs autonomes et les personnes cumulant des emplois sont exclus du champ d'observation. Les définitions suivantes expliquent les raisons de l'exclusion :

Les travailleurs à temps partiel sont des personnes occupées qui travaillent habituellement moins de 30 heures par semaine. Leur horaire de travail, contrairement à celui des travailleurs à temps plein, leur laisse généralement plus de temps pour s'acquitter de leurs obligations personnelles ou familiales en dehors des heures normales de travail. De même, des événements qui entraînent normalement une absence surviennent parfois les jours où le travailleur à temps partiel n'est pas attendu au travail. Il n'est donc pas surprenant que les taux d'absence aient tendance à être moins élevés chez les travailleurs à temps partiel.

The **self-employed** includes all persons working for themselves in incorporated or unincorporated businesses, with or without paid help. Self-employed workers generally control their work schedules, so an 'absence from work' means something different for them than for employees. The same is true for unpaid workers in a family business.

Multiple jobholders are workers with two or more jobs. It is not possible using LFS data to link time they may have lost, or the reason for it, to a specific job. Also, since the LFS records an industry and occupation description only for the main job (the one involving the most hours per week), time lost cannot be accurately allocated to an industry or an occupation.

In 1997, the redesigned LFS split the personal or family responsibility work absence code into subcategories, allowing maternity leave to be excluded. Women who have a full-time job but are on maternity leave have been excluded from Section A tables in this publication. Since these absences are mostly scheduled and long-term and affect only women, they have also been excluded from the post-redesign series in Section B.

Industry and occupation are based on the 1997 North American Industry Classification System and the 1991 Standard Occupational Classification.

Workplace size refers to the number of employees at the location of employment. This may not reflect the total employment for firms operating in more than one location.

Job tenure refers to the number of consecutive months or years a person has worked for the current employer. The employee may have worked in one or more occupations or one location, or experienced periods of temporary layoff and still be considered to have continuous tenure if the employer has not changed. But if a person has worked for the same employer over different periods of time, job tenure measures the most recent period of uninterrupted work.

A permanent job is one that is expected to last as long as the employee wants it, given that business conditions permit. That is, there is no pre-determined termination date. A non-permanent job has a predetermined end date, or will end as soon as a specified project is completed. Included are jobs that are seasonal;

La catégorie des **travailleurs autonomes** comprend toute personne qui travaille dans sa propre entreprise, constituée ou non en société, avec ou sans aide rémunérée. Le travailleur autonome détermine habituellement son propre horaire de travail. Une « absence » du travail de la part d'un travailleur autonome n'équivaut donc pas à une absence de la part d'un employé. Il en va de même pour les personnes qui travaillent sans rémunération dans une entreprise familiale.

Les personnes cumulant des emplois sont les travailleurs qui détiennent deux emplois ou plus. Les données de l'EPA ne permettent pas de lier les heures qu'ils ont perdues, pas plus que les motifs de ces pertes, à un emploi précis. De même, l'EPA ne recueille des renseignements sur l'industrie et la profession qu'à l'égard de l'emploi principal (celui auquel est habituellement consacré le plus grand nombre d'heures par semaine). Il est donc impossible de ventiler les données sur les heures perdues selon l'industrie ou la profession.

En 1997, lors du remaniement de l'EPA, on a scindé le code d'absence pour obligations personnelles ou familiales en sous-catégories, ce qui a permis l'exclusion du congé de maternité. Les femmes qui occupent un emploi à temps plein mais qui sont en **congé de maternité** sont exclues des tableaux de la section A de la présente publication. Puisque ces absences, pour la plupart, sont prévues et de longue durée et qu'elles touchent seulement les femmes, elles ont également été exclues des séries d'après le remaniement se trouvant dans la section B.

Les **industries et les professions** sont tirées de la version de 1997 du Système de classification des industries de l'Amérique du Nord et de la version de 1991 de la Classification type des professions.

La taille de l'établissement correspond au nombre d'employés que compte le lieu de travail. Ce total peut ne pas correspondre à l'ensemble des employés d'une entreprise dont les activités sont effectuées dans plus d'un endroit.

La durée de l'emploi est le nombre de mois ou d'années consécutifs pendant lesquels une personne a travaillé pour l'employeur actuel. Peu importe que l'employé ait occupé plus d'un emploi ou travaillé à plus d'un endroit, ou qu'il ait connu des périodes de mise à pied temporaire, si l'employeur est demeuré le même, on considère que la période d'emploi est ininterrompue. Cependant, si une personne a travaillé pour le même employeur pendant différentes périodes, la durée de l'emploi correspond à la période la plus récente pendant laquelle l'employé a travaillé sans interruption.

Un emploi permanent est un emploi qui devrait durer aussi longtemps que l'employé le désire, à la condition que la conjoncture économique le permette; la date de cessation d'un tel emploi n'est donc pas déterminée à l'avance. Un emploi non permanent est un emploi dont la date de cessation est prédéterminée ou qui se terminera dès qu'un

temporary, term or contract, including work done through a temporary help agency; casual; and other temporary work.

Census metropolitan area (CMA) is an urbanized core with a total population of at least 100,000 together with its main labour market area (determined by commuting patterns). The CMA to which the job belongs is determined by the respondent's place of residence, not place of work.

What is absenteeism?

There are many kinds of absences. Some, such as annual vacations, are generally considered to be economically healthy for both the organization and the employee. Also, they are usually scheduled so that their effect upon the organization can be easily absorbed; the same is true for statutory holidays. Others, such as those caused by illness and family-related demands, are generally unscheduled. Some absences, such as those due to inclement weather, are uncontrollable, but some, like 'own illness,' can be controllable to some extent.

'Absenteeism,' used generally to refer to absences that are controllable, habitual and often unscheduled, is a source of irritation to employers and co-workers. Unscheduled absences are disruptive to proper work scheduling and output, and costly to an organization and the economy as a whole. Invariably, the absences are for personal reasons (namely, illness or disability, and personal or family responsibilities).

Although absenteeism is widely acknowledged to be a problem, it is not easy to quantify. The dividing line between controllable/uncontrollable, avoidable/unavoidable absences is difficult to draw, and absenteeism generally masquerades as legitimate absence. A data source such as the Labour Force Survey (LFS) can provide measures of time lost due to illness or disability, and personal or family responsibilities. However, within these categories, it is not possible to distinguish between avoidable/unavoidable, controllable/uncontrollable, or scheduled/unscheduled absences. LFS data on all absences for personal reasons can, however, be analysed to identify patterns or trends that indicate the effect of absenteeism.

projet donné aura pris fin. Cela comprend les emplois saisonniers, temporaires (c'est-à-dire pour une durée déterminée ou dans le cadre d'un contrat de travail, y compris le travail effectué par le truchement d'une agence de placement temporaire), les emplois occasionnels et les autres emplois temporaires.

On définit une région métropolitaine de recensement (RMR) comme étant un noyau urbain comptant au moins 100 000 habitants, noyau auquel se rattache la principale région de son marché du travail (déterminée d'après les habitudes de navettage). L'appartenance d'un emploi à une RMR est déterminée par le lieu de résidence du répondant, et non par son lieu de travail.

Qu'est-ce que l'absentéisme?

Les absences varient beaucoup. Certaines, comme les vacances annuelles, sont généralement considérées comme étant économiquement saines, tant pour l'organisation que pour le salarié. De plus, elles sont habituellement prévues de façon à ce que leur influence sur l'organisation puisse être absorbée facilement. On peut dire la même chose des jours fériés. D'autres absences, comme celles attribuables à la maladie et aux obligations familiales, sont généralement imprévues. Dans le cas de certaines absences, comme celles causées par le mauvais temps, nous n'y pouvons tout simplement rien. Par contre, certaines absences, comme celles pour cause de maladie personnelle, peuvent être évitées jusqu'à un certain point.

L'« absentéisme », terme utilisé généralement pour désigner les absences évitables, habituelles et souvent imprévues, constitue une source d'irritation pour les employeurs et les collègues de travail. Les absences imprévues perturbent le calendrier de travail et la production et entraînent des coûts pour l'organisation et l'économie dans son ensemble. Invariablement, ce sont des absences pour des motifs personnels (maladie ou incapacité et obligations personnelles ou familiales).

Bien que l'absentéisme soit généralement considéré comme un problème, il n'est pas un phénomène facile à quantifier. La ligne de démarcation entre les absences évitables et inévitables est difficile à tracer et l'absentéisme est souvent déguisé en absence légitime. Une source de données comme l'Enquête sur la population active (EPA) permet de mesurer le temps perdu pour cause de maladie ou d'incapacité ou pour des obligations personnelles ou familiales, mais, à l'intérieur de ces catégories, elle ne permet pas de distinguer les absences évitables des absences inévitables, les absences prévues des absences imprévues. Toutefois, on peut analyser les données de l'EPA sur toutes les absences pour ces motifs personnels afin de déterminer les comportements ou les tendances qui laissent voir les effets de l'absentéisme.

This publication presents absence rates due to personal reasons, which accounted for about 28% of all time lost by full-time employees each week in 2001. Vacations, which accounted for about 47% of total time away from work, are not counted in this study, nor are statutory holidays, which represented 12%. Maternity leave accounted for 8% and other reasons. 6%.

The absence rate data in Section A were derived from the redesigned 1997 LFS Questionnaire (see Appendix). Questions 100, 150 to 154 and 157 are used to derive partweek absences and questions 100, 101, 130, 150 and 151, full-week absences.

Reasons for absence

The LFS redesign in 1997 resulted in changes being made to the reasons for being away all or part of the week. This publication provides data incorporating both the pre- and post-redesign reasons. In this way, new data can be examined and a time series can be maintained for comparison purposes.

Before the 1997 redesign, the LFS grouped the reasons as follows:

- illness or disability
- personal or family responsibilities
- weather (part-week absence)
- labour dispute
- vacation
- holiday (part-week absence)
- working short time (part-week absence)
- laid off during week
- new job started during week
- seasonal business (full-week absence)
- other

The first two reasons are referred to as absences from work for personal reasons. Persons absent because of illness or disability include those who missed work because of medical or dental appointments or other temporary health-related absences. Absence for personal or family responsibilities includes taking care of children, attending funerals, appearing in court, serving on a jury, and taking care of a sick family member. Longer absences, such as maternity leave, are also included.

La présente publication présente les taux d'absence pour des motifs d'ordre personnel. Ces absences ont représenté environ 28 % des heures de travail perdues chaque semaine en 2001 chez les employés à temps plein. Les vacances, qui représentaient environ 47 % du temps non consacré au travail, ne sont pas considérées comme des absences pour les besoins de la présente étude, de même que les congés fériés, qui représentaient 12 % du total des absences. Les absences liées à un congé de maternité représentaient 8 %, celles relatives à d'autres motifs, 6 %.

Les données sur les taux d'absence de la section A proviennent des modifications qui ont été apportées au questionnaire de l'EPA en 1997 (voir l'annexe). Les questions 100, 150 à 154 et 157 ont trait aux absences pour une partie de la semaine, tandis que les questions 100, 101, 130, 150 et 151 concernent les absences pour toute la semaine.

Motifs des absences

Le remaniement de l'EPA en 1997 a donné lieu à des modifications des motifs à l'origine des absences pour toute la semaine ou pour une partie de celle-ci. La présente publication comporte à la fois des données qui ont trait aux motifs avant et après le remaniement. On peut ainsi examiner les nouvelles données et maintenir une série chronologique permettant de faire des comparaisons.

Avant le remaniement de 1997, l'EPA considérait les motifs suivants à l'appui des absences :

- maladie ou incapacité
- obligations personnelles ou familiales
- mauvais temps (absence pour une partie de la semaine)
- conflit de travail
- vacances
- jour férié (absence pour une partie de la semaine)
- travail à temps réduit (absence pour une partie de la semaine)
- mise à pied au cours de la semaine
- début d'un nouvel emploi au cours de la semaine
- entreprise saisonnière (absence pour toute la semaine)
- autre

Les deux premiers motifs sont considérés comme étant d'ordre personnel. Les personnes qui se sont absentées pour cause de maladie ou d'incapacité comprennent celles qui avaient un rendez-vous chez le médecin ou chez le dentiste ou qui s'étaient absentées temporairement pour un autre motif lié à la santé. Les absences pour des motifs d'ordre personnel ou familial comprennent les absences pour prendre soin des enfants, pour assister à des funérailles, pour comparaître devant un tribunal, pour faire partie d'un jury et pour prendre soin d'un membre malade de la famille. Sont également incluses les absences prolongées comme les congés de maternité.

After the redesign, reasons were changed to read:

- own illness or disability
- caring for own children
- caring for elder relative (60 years or older)
- maternity leave (women only)
- other personal or family responsibilities
- vacation
- labour dispute (strike or lockout)
- temporary layoff due to business conditions
- holiday (legal or religious)
- weather
- job started or ended during week
- working short time (because of material shortages, plant maintenance or repair, for instance)
- other

Illness or disability remain unchanged, whereas personal or family responsibilities now consist of caring for own children, caring for elder relative, and other personal or family responsibilities. Maternity leave is excluded from the estimates.

The elimination of maternity leave has led to an overall decline in women's work absence estimates for personal or family responsibilities.

How absences are measured

This publication uses three measures of absence.

The **incidence** of absence is the percentage of full-time employees reporting some absence in the reference week. In calculating incidence, the length of work absence—whether an hour, a day, or a full week—is irrelevant.

The **inactivity rate** shows hours lost as a proportion of the usual weekly hours of all full-time employees. It takes into account both the incidence and length of absence.

Days lost per worker are calculated by multiplying the inactivity rate by the estimated number of working days in the year (250).

The estimated number of working days in the year (250) is in line with other research in the field. This number assumes that the typical full-time employee works a 5-day week (the 1995 Survey of Work Arrangements showed that 75% of full-timers worked a 5-day week) and is entitled to all statutory holidays (around 10 days a year). Thus, the potential annual labour supply of a typical worker would be 52 weeks

L'EPA remaniée, dont on utilise ici les estimations de 1997, considère les motifs d'absence du travail suivants :

- maladie ou incapacité de l'enquêté(e)
- soins à donner à ses enfants
- soins à donner à un parent âgé (60 ans ou plus)
- congé de maternité (femmes seulement)
- autres obligations personnelles ou familiales
- vacances
- conflit de travail (grève ou lock-out)
- mise à pied temporaire due à la conjoncture économique
- jour férié (civil ou religieux)
- mauvais temps
- début ou fin d'emploi durant la semaine
- travail à temps réduit (en raison d'un manque d'équipement, de l'entretien ou de la réparation de l'usine, par exemple)
- autre

Les motifs liés à la maladie ou à l'incapacité sont les mêmes, tandis que les obligations personnelles ou familiales comprennent maintenant le soin des enfants, le soin d'un parent âgé et les autres obligations personnelles ou familiales. Le congé de maternité est exclu des estimations.

L'exclusion du congé de maternité dans les statistiques a entraîné chez les femmes une baisse générale des estimations relatives aux absences pour cause d'obligations personnelles ou familiales.

Comment les absences sont mesurées

Trois mesures d'absence sont utilisées dans la présente publication.

La **fréquence** des absences est le pourcentage d'employés à temps plein qui s'absentent au cours de la semaine de référence. Dans le calcul de la fréquence, on ne tient pas compte de la durée de l'absence — qu'il s'agisse d'une heure, d'une journée ou d'une semaine complète.

Le taux d'inactivité est la proportion d'heures perdues par rapport au nombre total d'heures hebdomadaires habituellement travaillées par tous les employés à temps plein. On tient compte à la fois de la fréquence et de la durée de l'absence.

On calcule le **nombre de jours perdus** par travailleur en multipliant le taux d'inactivité par le nombre estimatif de jours ouvrables dans l'année (250).

Conformément à d'autres études menées sur le sujet, on a estimé à 250 le nombre de jours ouvrables dans 1'année. Ce nombre repose sur l'hypothèse selon laquelle le travailleur à temps plein typique travaille 5 jours par semaine — l'Enquête sur les horaires et les conditions de travail menée en 1995 révèle en effet que 75 % des travailleurs à temps plein avaient un horaire de travail de cinq jours par semaine — et a droit à tous les congés fériés (environ 10 jours par année). Ainsi, le

multiplied by 5, less 10 statutory holidays, or 250 days. This allows the days lost per worker in a year to be calculated.

Varying the number of working days would slightly alter the number of person-days lost in the year, but not the thrust of the findings as they relate to different industries, demographic groups, and so forth.

Frequently asked questions

- **Q.** What is the data source for these absence rates?
- A. The data are based on annual averages from the Labour Force Survey (see *Data source*), not a special survey of absenteeism.

Although the LFS was not specifically designed to capture the incidence and level of absence from work, it is the best source of data on the subject. Use of a household survey to provide such data is not unique to Canada. All countries belonging to the Organisation for Economic Co-operation and Development (OECD) have surveys like the LFS that provide data on persons 'with a job but not at work.' Many of these surveys look at the reasons for the difference between usual and actual hours worked (that is, number of hours absent) in the reference week; these data can be used to generate work absence rates. Unfortunately, differences in the classification of reasons for work absence, and in periodicity, etc., have made international comparisons difficult. Both the OECD and the International Labour Office are currently making efforts to promote the gathering and publication of comparable data.

Most firms and institutions in Canada keep records on worker absences for administrative and accounting purposes. Again, differences in coverage, periodicity and definitions limit comparability or across-industry aggregation of the data into meaningful national rates by sex, age, industry, occupation, and so forth.

- **Q.** Is maternity leave included in the absence data?
- A. As of 1997, women with a full-time job but on maternity leave are excluded from the data. Prior to the 1997 redesign, this was not possible. Maternity leave is not considered a reason for absenteeism since it is often scheduled and thus entails minimal disruption at the workplace.

potentiel annuel de travail d'un travailleur typique est calculé en multipliant 52 semaines par 5 et en soustrayant 10 congés fériés, ce qui donne 250 jours. Cela permet en outre de calculer le nombre de jours perdus par travailleur dans l'année.

Le fait de varier le nombre de jours ouvrables a pour effet de modifier légèrement le nombre de jours-personnes perdus dans l'année, sans toutefois modifier l'essence même des conclusions, qui ont trait à diverses industries, à divers groupes démographiques, etc.

Questions fréquemment posées

- Q. Quelle est la source des données de cette publication?
- R. Les données sont fondées sur des moyennes annuelles tirées de l'Enquête sur la population active (EPA) (voir la section Source des données) et non sur les résultats d'une enquête spéciale sur les absences du travail.

Bien que l'EPA ne vise pas précisément à mesurer la fréquence et le niveau des absences du travail, elle constitue la meilleure source de données sur le sujet. Le Canada n'est pas le seul pays à utiliser une enquêteménage pour obtenir de telles données. Tous les pays membres de l'Organisation de coopération et de développement économiques (OCDE) mènent des enquêtes auprès des ménages (comme l'EPA) qui permettent de recueillir des données sur les personnes « qui ont un emploi mais qui ne sont pas au travail ». Nombre de ces enquêtes expliquent la différence entre les heures habituellement travaillées et les heures effectivement travaillées (c'est-à-dire le nombre d'heures perdues) au cours de la semaine de référence. Ces données peuvent servir au calcul du taux d'absence du travail. Malheureusement, les différences à l'égard des motifs d'absence, de la périodicité, etc. rendent difficile toute comparaison internationale de ces taux. L'OCDE et le Bureau international du travail collaborent actuellement au rassemblement de données comparables et à leur diffusion.

La plupart des sociétés et des institutions au Canada tiennent à jour, à des fins administratives et comptables, des dossiers sur les absences des travailleurs. Encore une fois, les différences à l'égard du champ d'observation, de la périodicité et des définitions ont pour effet de limiter le degré de comparabilité et le regroupement, pour l'ensemble des industries, des différentes données sous forme de taux nationaux significatifs selon le sexe, l'âge, l'industrie, la profession, etc.

- Q. Les données comprennent-elles les congés de maternité?
- R. Depuis 1997, les femmes occupant un emploi à temps plein mais en congé de maternité ne sont pas incluses dans ces données. Avant le remaniement de 1997, cela n'était pas possible. Le congé de maternité n'est pas considéré comme une cause d'absence du travail. Il est souvent prévu et occasionne ainsi un dérangement minimal dans le milieu de travail.

- Q. How are long-term disability absences treated?
- A. The LFS does not distinguish between long- and short-term disability absences. Those who are absent but consider themselves 'employed,' and who receive full or partial pay from their employer, are included in the illness or disability category, irrespective of length of absence. In 2001, an average of 16,000 employees each week had been absent from work for over a year because of illness or disability. Their exclusion would have had a minimal effect on the overall findings.
- Q. Are absences resulting from work-related injuries or illness included in the data?
- A. The LFS does not ask if an illness or disability is work-related. Thus, all such absences are included in the data in this publication.
- **Q.** Do the data include both paid and unpaid absences?
- A. Yes, both are included. However, only persons on full-week absences are asked whether they received any wages from their employer for any time lost from work. Those on part-week absences are not asked this question.
- Q. Does the LFS measure the effect of stress?
- A. Not directly. While stress may be an important factor in explaining work absences, this reason and others, such as worker boredom (with repetitive work, for example), employer-employee relations, and poor working conditions—all of which affect work attendance—are not listed separately in the LFS response categories. Answers to such questions are often difficult to substantiate.

Industry and occupation classifications

In January 1999, the Labour Force Survey (LFS) began to release data using the North American Industry Classification System (NAICS) and the Standard Occupational Classification (SOC 1991). To aid labour market observers and analysts interested in trends, the LFS also recoded its data back to 1987 using NAICS and SOC 1991 standards and definitions.

- Q. Comment traite-t-on les absences pour cause d'incapacité de longue durée?
- R. L'EPA ne fait pas de distinction entre l'absence pour cause d'incapacité de longue durée et celle de courte durée. Les travailleurs qui se considèrent comme « occupés », et qui reçoivent de leur employeur leur plein salaire ou une partie de celui-ci, sont compris dans la catégorie des absences pour cause de maladie ou d'incapacité, quelle que soit la durée de celles-ci. En 2001, le nombre d'employés qui étaient absents du travail depuis plus d'un an pour cause de maladie ou d'incapacité était, en moyenne, de 16 000 au cours d'une semaine normale. Leur exclusion aurait eu peu de répercussions sur les résultats d'ensemble.
- Q. Les données comprennent-elles les absences attribuables à des lésions ou à des maladies découlant d'un accident de travail?
- R. Dans l'EPA, on ne demande pas si la maladie ou l'incapacité du répondant sont liées à un accident de travail. Toutes les absences de ce genre sont incluses dans les données de la présente publication.
- Q. Les données comprennent-elles les congés payés et non payés?
- R. Oui, ces deux types de congé sont compris. Cependant, on ne demande qu'aux personnes absentes pendant toute la semaine si elles ont reçu une rémunération quelconque de leur employeur pendant qu'elles étaient absentes du travail, la question n'étant pas posée aux personnes absentes pendant une partie de la semaine.
- Q. L'EPA mesure-t-elle les effets du stress?
- R. Pas directement. Bien que le stress puisse être un facteur important qui expliquerait les absences du travail, ce motif et d'autres, comme un travail ennuyant (par exemple, un travail répétitif), de mauvaises relations entre l'employé et l'employeur et de mauvaises conditions de travail qui tous influent sur l'assiduité au travail —, ne sont pas énumérés séparément dans les catégories de réponses de l'EPA. Les réponses à ces questions sont souvent difficiles à vérifier.

Les classifications des industries et des professions

En janvier 1999, l'Enquête sur la population active (EPA) a commencé la diffusion de données selon le Système de classification des industries de l'Amérique du Nord (SCIAN) et la Classification type des professions (CTP de 1991). En guise d'aide aux utilisateurs et aux analystes des renseignements sur le marché du travail qui s'intéressent aux tendances, l'EPA a également recodé ses données, aussi loin que 1987, en fonction des normes et des définitions du SCIAN et de la CTP de 1991.

The industry and occupation work absence data presented in this report are based on NAICS and SOC 1991, and as such differ from those contained in earlier reports and studies using the SIC 1980 and SOC 1980. A brief review of differences between the old and new classifications (including an examination of the LFS algorithm for classifying employment by industry and occupation) and comparison tables are presented below and in the appendix.

Classifying employment by industry and occupation

Questions classifying job activity

As part of the monthly LFS questionnaire, respondents who are currently employed, or who had a job or business within the previous 12 months, are asked to provide information on the nature of their work. The coding of industry, occupation and public/private status is based on the responses given to the following four questions:

For whom did (this person) work?

If the respondent is self-employed, the question is customized to read 'What was the name of this person's business?'

What kind of business, industry or service was this?

What kind of work was (this person) doing?

What were (this person's) most important activities or duties?

Coding

The LFS uses a combination of automated and manual coding. Approximately 30% of industry and occupation codes are assigned automatically. The remainder are manually assigned by experienced coders.

Public/private sector redefined

Another definitional change introduced by the LFS in January 1999 pertains to the public and private sectors of the economy.

The distinction between public and private sector employment is important in the analysis of output and employment growth. Prior to 1999, the LFS used 'ownership' as the basis for classification to the public sector. This differed slightly from the definition used by the System of National Accounts (SNA) (which was related to 'funding and control').

Les données sur l'absence du travail selon l'industrie et la profession présentées dans ce rapport sont conformes au SCIAN et à la CTP de 1991. Elles diffèrent donc des données qui se trouvent dans les études et les rapports antérieurs, qui étaient fondées sur les classifications types des industries et des professions de 1980. Nous vous présentons, dans les paragraphes qui suivent et dans l'annexe, une courte analyse des différences entre les anciennes et les nouvelles classifications (incluant un examen des algorithmes de l'EPA pour la classification des emplois selon l'industrie et la profession) ainsi que des tableaux de comparaison.

Classification de l'emploi selon l'industrie et la profession

Questions permettant de classifier l'emploi

Dans le questionnaire mensuel de l'EPA, on demande aux répondants qui sont présentement occupés ou qui avaient un emploi ou une entreprise au cours des 12 derniers mois de fournir des renseignements sur la nature de leur travail. Le codage de l'industrie, de la profession et du secteur public ou privé repose sur les réponses données aux quatre questions suivantes:

Pour qui (cette personne) travaillait-elle?

Si le répondant est un travailleur indépendant, la question est adaptée de la façon suivante: « Quel était le nom de l'entreprise de cette personne? »

De quel genre d'entreprise, d'industrie ou de service s'agissait-il?

Quel genre de travail (cette personne) faisait-elle?

Quelles étaient les activités ou fonctions les plus importantes de (cette personne)?

Codage

L'EPA utilise une combinaison de codage automatisé et de codage manuel. Environ 30 % des codes d'industrie et de profession sont assignés de façon automatique. Les autres codes sont assignés manuellement tous les ans par des codeurs expérimentés.

Révision des secteurs public et privé

Un autre changement sur le plan des définitions introduit par l'EPA en janvier 1999 porte sur les secteurs public et privé de l'économie.

La distinction entre l'emploi dans le secteur public et le secteur privé est importante dans l'analyse des extrants et de la croissance de l'emploi. Avant 1999, l'EPA considérait la « propriété » comme la base de la classification du secteur public. Cette définition différait légèrement de celle utilisée par le Système de comptabilité nationale (SCN). (Cette dernière avait plutôt trait au financement et au contrôle.)

As of January 1999, LFS data have been harmonized to the SNA standard. Under the former 'ownership' rules, LFS classified about 60% of hospital workers to the private sector, within the broad group of health and social services. These workers are now coded as public. Under the old rules, employment by universities was coded to the private sector. This group is now also coded to the public sector. The sector data have been revised back to 1976.

Data quality

The Labour Force Survey produces estimates based on information drawn from a sample survey of households. Somewhat different estimates might have been obtained if a complete census had been taken using the same questionnaire, interviewers, supervisors, processing methods, and so forth. The difference between the estimates obtained from the sample and a complete count taken under similar conditions is called the sampling error of the estimate.

While the sampling error is not known, it can be estimated from the sample data. One measure used is the coefficient of variation (CV), which is the standard deviation expressed as a percentage of the estimate. Since it can be very time-consuming and expensive to compute CVs for a large number of estimates from a complex survey such as the LFS, an indirect measure of reliability may be used. Generally speaking, the larger the estimate, the smaller its CV. Analysis has shown that LFS estimates of less than 1,500 typically have high CVs, making them unreliable.

In this publication, absence rates at the national level are considered reliable enough if they are derived from estimates of at least 1,500. For example, in 1997 the estimated number of male full-time employees aged 65 and over was 32,700. Since the estimated number of these men with absences was below the reliability threshold of 1,500, no rates are shown. Estimates not reliable enough to be published are shown as 'F'.

For provinces and regions, reliability thresholds are as follows:

| Atlantic provinces | 500 | Ontario | 1,500 |
|----------------------|-------|------------------|-------|
| Newfoundland and | | | |
| Labrador | 500 | Prairies | 1,500 |
| Prince Edward Island | 200 | Manitoba | 500 |
| Nova Scotia | 500 | Saskatchewan | 500 |
| New Brunswick | 500 | Alberta | 1,500 |
| Quebec | 1,500 | British Columbia | 1,500 |

Depuis janvier 1999, les données de l'EPA ont été harmonisées aux normes du SCN. D'après les anciennes règles de « propriété », l'EPA classait environ 60 % des employés d'hôpitaux dans le secteur privé, à l'intérieur du grand groupe de la santé et des services sociaux. Ces travailleurs sont maintenant classés dans le secteur public. De plus, d'après les règles liées à la propriété, l'emploi dans les universités était codé comme faisant partie du secteur privé. Ce groupe est lui aussi maintenant codé dans le secteur public. Les données du secteur ont été révisées jusqu'en 1976.

Qualité des données

L'Enquête sur la population active permet de produire des estimations fondées sur les données tirées d'une enquête-échantillon menée auprès des ménages. On aurait pu obtenir des estimations légèrement différentes si l'on avait procédé à un recensement en faisant appel au même questionnaire et aux mêmes intervieweurs, superviseurs, méthodes de traitement, etc. L'écart entre les estimations découlant de l'échantillon et celles tirées d'un dénombrement complet effectué dans des conditions semblables est appelé erreur d'échantillonnage des estimations.

Bien que l'erreur d'échantillonnage ne soit pas connue, elle peut toutefois être estimée au moyen des données-échantillon. L'une des mesures utilisées pour ce faire s'appelle le coefficient de variation (CV), lequel constitue l'écart-type exprimé en pourcentage de l'estimation. Puisqu'il serait nettement trop long et trop onéreux de calculer les CV de toute une série d'estimations tirées d'une enquête aussi complexe que l'EPA, on peut avoir recours à une mesure de confiance indirecte. De façon générale, plus l'estimation est grande, plus le CV sera petit. L'analyse révèle que les estimations tirées de l'EPA qui sont inférieures à 1 500 ont systématiquement des CV élevés, ce qui par conséquent les rend moins fiables.

Dans la présente publication, on considère comme suffisamment fiables les taux d'absence nationaux tirés d'estimations atteignant au moins 1 500. Par exemple, en 1997, on estimait à 32 700 le nombre d'employés masculins à temps plein ayant 65 ans et plus. Cependant, si on considère parmi eux ceux qui étaient absents, on obtient une estimation inférieure au seuil de confiance de 1 500, ce qui explique dans ce cas l'absence de taux. Les estimations non suffisamment significatives pour être publiées sont indiquées au moyen d'un F.

Voici les seuils de confiance des différentes provinces et régions :

| Atlantique | 500 | Ontario | 1 500 |
|-----------------------|-------|----------------------|-------|
| Terre-Neuve-et- | | | |
| Labrador | 500 | Prairies | 1 500 |
| Île-du-Prince-Édouard | . 200 | Manitoba | 500 |
| Nouvelle-Écosse | 500 | Saskatchewan | 500 |
| Nouveau-Brunswick | 500 | Alberta | 1 500 |
| Québec | 1 500 | Colombie-Britannique | 1 500 |

Errors that are not related to sampling may occur at almost any phase of a survey operation. Interviewers may misunderstand instructions, respondents may make errors in answering questions, answers may be incorrectly entered on the questionnaire, or errors may be introduced in the processing and tabulation of the data. These are all examples of non-sampling errors.

Over a large number of observations, randomly occurring errors will have little effect on estimates derived from the survey. However, errors occurring systematically will contribute to biases in the survey estimates. Considerable time and effort was taken to reduce non-sampling errors in the survey. Quality-assurance measures, implemented at each stage of the data collection and processing cycle, included the use of well-trained and highly skilled interviewers, the observation of interviewers to detect problems of questionnaire design or misunderstanding of instructions, the use of procedures to ensure that data-capture errors were minimized, and the provision of coding and edit quality checks to verify the processing logic.

Des erreurs qui ne se rapportent pas à l'échantillonnage peuvent se produire à presque toutes les phases d'une enquête. Il se peut que les intervieweurs comprennent mal les instructions, que les enquêtés fassent des erreurs en répondant aux questions, que des réponses soient mal inscrites sur les questionnaires et que des erreurs soient introduites lors du traitement et de la totalisation des données. Ces erreurs sont toutes des exemples d'erreurs non attribuables à l'échantillonnage.

Sur un grand nombre d'observations, les erreurs aléatoires auront peu d'effet sur les estimations tirées des données recueillies dans le cadre de l'enquête. Toutefois, les erreurs qui se produisent systématiquement contribueront à biaiser les estimations de l'enquête. On a consacré beaucoup de temps et d'efforts à réduire les erreurs non attribuables à l'échantillonnage dans l'enquête. Des mesures d'assurance de la qualité ont été appliquées à chaque étape du cycle de collecte et de traitement des données. Ces mesures comprenaient l'emploi d'intervieweurs très expérimentés, l'observation des intervieweurs afin de trouver les problèmes liés à la conception du questionnaire ou à la mauvaise interprétation des instructions, l'utilisation de procédures afin de s'assurer que les erreurs de saisie des données étaient minimisées et des vérifications de la qualité du codage et du contrôle afin de vérifier la logique du traitement.

 GO TO LABOUR FORCE INFORMATION COMPONENT FOR EACH PERSON AGED 15+ AND NOT A REGULAR MEMBER OF THE ARMED FORCES

Labour force information

PATHS

- Employed, at work
- 2 Absent from work
- 3 Temporary layoff
- 4 Job seeker
- 5 Future start
- 6 Not in labour force, able to work
- 7 Not in labour force, permanently unable to work

JOB ATTACHMENT

100 Many of the following questions concern ...'s activities last week. By last week I mean the week beginning on Sunday, [date], and ending last Saturday [date].

Last week, did ... work at a job or business?

(regardless of the number of hours)

Yes, PATH = 1, go to 102

No, go to 101

Permanently unable to work, PATH = 7, go to 104

101 Last week did ... have a job or business from which he/she was absent? No, go to 104

102 Did ... have more than one job or business last week?

No, go to 110

103 Was this a result of changing employers?

PAST JOB ATTACHMENT

- 104 Has ... ever worked at a job or business?

 No, go to 170
- 105 When did ... last work?

If subsequent interview and no change in 105 and PREVIOUS-PATH = 3, go to 131 If subsequent and no change in 105 and PREVIOUS-PATH = 4 to 7, go to 170 If not within last year, go to 170 If not last month, and PATH = 7, go to 131 If not last month and PATH not 7, go to 110

106 Was that before or after Sunday, [date following last reference week]?

If PATH = 7, go to 131, Otherwise go to 110

JOB DESCRIPTION

110 I am now going to ask some questions about ...'s [new] job or business [at which he/she usually works the most hours]. Was ... an employee or selfemployed? If not "self employed", go to 114

111 Did ... have an incorporated business?

- 112 Did ... have any employees?
- 113 What was the name of ...'s business?

 Go to 115
- 114 For whom did ... work?
- 115 What kind of business, industry or service was this?
- 116 What kind of work was ... doing?
- 117 What were ...'s most important activities or duties?
- 118 When did ... start working [at name of employer]? If not last month, go to 130
- 119 Was that before or after Sunday [date following last reference week)?

 Go to 130

ABSENCE - SEPARATION

130 If PATH = 1, go to 150 If 101 = No, go to 131

What was the main reason ... was absent from work last week?

week? Temporary layoff, go to 134

Seasonal layoff, go to 136

Casual, go to 137

Otherwise, Employed but absent, PATH = 2, go to 150

131 What was the main reason ... stopped working at that [job/business)?

If not "Lost job or layoff", go to 137

132 Can you be more specific about the main reason for ...'s job loss?

If PATH = 7, go to 137
If not "Business conditions", go to 137

133 If date last worked over one year ago, go to 137

Does ... expect to return to that job?

No or "Not sure", go to 137

- 134 Has ...'s employer given him/her a date to return? Yes, go to 136
- 135 Has ... been given any indication that he/she will be recalled within the next 6 months?
- 136 As of last week, how many weeks had ... been on layoff?

 If 130 = "seasonal layoff" or absent more than 1 year, go to 137; otherwise, PATH = 3, go to 137
- 137 Did ... usually work more or less than 30 hours per week?

 If PATH = 3, go to 190

 Otherwise go to 170

WORK HOURS (MAIN JOB)

150 The following questions refer to ...'s work hours at [name of main job]. [Excluding overtime], does the number of [paid] hours ... works vary from week to week? Yes, go to 152 151 [Excluding overtime,] how many [paid] hours does ... work per week?

If PATH = 2, go to 158 If not employee, go to 157 Otherwise, go to 153

- 152 [Excluding overtime,] on average, how many [paid] hours does ... usually work per week?

 If PATH = 2, go to 158

 If not employee, go to 157
- 153 Last week, how many hours was ... away from this job because of vacation, illness, or any other reason? (remember that [civic holiday] occurred last week) 0 hours, go to 155
- 154 What was the main reason for that absence?
- 155 Last week, how many hours of paid overtime did ... work at this job?
- 156 Last week, how many extra hours without pay did ... work at this job?
- 157 If (employee and 150 = no) actual hours = 151-153 + 155 + 156, go to 158 Last week, how many hours did ... actually work at [name of main job]? (Remember that [civic holiday] occurred last week)
- 158 If 151 or 152 > 29, and PATH = 2, go to 162 If 151 or 152 > 29, and PATH = 1, go to 200 Does ... want to work 30 or more hours per week (at a single job)? Yes, go to 160
- 159 What is the main reason ... does not want to work 30 or more hours per week (at a single job)?

 If PATH = 2, go to 162

 Otherwise, go to 200
- 160 What is the main reason ... usually works less than 30 hours per week (at his/her main job)? If not ("business conditions" or "couldn't find fulltime") and PATH = 2, go to 162 If not ("business conditions" or "couldn't find fulltime") and PATH = 1, go to 200
- 161 At any time in the 4 weeks ending last Saturday, [date], did ... look for full-time work?

 If PATH = 2, go to 162

 Otherwise, go to 200

ABSENCE

- 162 As of last week, how many weeks had ... been continually absent from work? If not (employee or incorporated owner), go to 200
- 163 Is ... getting any wages or salary from his/her [employer/business] for any time off last week?

 Go to 200

JOB SEARCH - FUTURE START

- 170 If PATH = 7, go to 500
 In the 4 weeks ending last Saturday, [date], did ... do anything to find work?
 No, and age > 64, PATH = 6, go to 420
 No, and age < 65, go to 174
 Yes, PATH = 4
- 171 What did ... do to find work in the past 4 weeks? Did ... do anything else to find work?
- 172 As of last week, how many weeks had ... been looking for work? (since date last worked)
- 173 What was ...'s main activity before he/she started looking for work?

 Go to 177
- 174 Last week did ... have a job to start at a definite date in the future?

 No, PATH = 6, go to 176
- 175 Will ... start that job before or after Sunday, [date four weeks from survey week]?

 Before, PATH = 5, go to 190
 On or after, PATH = 6, go to 420
- 176 Did ... want a job last week? No, go to 420
- 177 Did ... want a job with more or less than 30 hours per week?
- 178 If PATH = 4, go to 190
 What was the main reason ... did not look for work last
 week?
 If not "Believes no work available", go to 420
 Otherwise, go to 190

AVAILABILITY

- 190 Could ... have worked last week [if he/she had been recalled/if a suitable job had been offered? Yes, go to 400
- 191 What was the main reason ... was not available to work last week?

 Go to 400

EARNINGS - UNION - PERMANENCE

- 200 If not Employee (at main job), go to 300
 If subsequent and no change in 110, 114, 115, 116, 117, 118, go to 260
 Now I'd like to ask a few short questions about ...'s earnings from (name of main job). Is ... paid by the hour?
- 201 Does ... usually receive tips or commissions? If 200 = no, go to 204
- 202 [Including tips and commissions,] what is ...'s hourly rate of pay?

 Go to 220

- 204 What is the easiest way for you to tell us ...'s wage or salary [including tips and commissions], before taxes and other deductions? Would it be yearly, monthly, weekly, or on some other basis?
- 205 [Including tips and commissions,] what is ...'s
- to [weekly/bi-weekly/semi-monthly/monthly/yearly]
- 209 wage or salary, before taxes and other deductions?
- 220 Is ... a union member at [name of main job]? Yes, go to 240
- 221 Is ... covered by a union contract or collective agreement?
- 240 Is ...'s job permanent, or is there some way that it is not permanent? (e.g. seasonal, temporary, term, casual, etc.)

 Permanent, go to 260
- 241 In what way is ...'s job not permanent? Go to 260

FIRM SIZE

- 260 About how many persons are employed at the location where ... works for [name of business/ his/her employer]? Would it be less than 20, 20 to 99, 100 to 500, or over 500?
 If not September or November, go to 300
- 261 Does [name of business/...'s employer] operate at more than one location?

 No, or 260 = "over 500", go to 300
- 262 In total, about how many persons are employed at all locations? Would it be less than 20, 20 to 99, 100 to 500, or over 500?

 Go to 300

CLASS OF WORKER - HOURS AT OTHER JOB

- 300 If 102 = no, go to 400 Now I have a couple of questions about ...'s [other/old] job or business. Was ... an employee or self-employed? If not "self-employed", go to 320
- 301 Did ... have an incorporated business?
- 302 Did ... have any employees?
- 320 Excluding overtime, how many [paid] hours [did/does] ... usually work per week at this [job/business]?

 If PATH = 2, go to 400
- 321 Last week, how many hours did ... actually work at this [job/business]? [Remember that [civic holiday] occurred last week.]

 Go to 400

TEMPORARY LAYOFF JOB SEARCH

400 If PATH not 3, go to 420
In the 4 weeks ending last Saturday, [date], did ... look for a job with a different employer?
Go to 420

PREVIOUS SEPARATION

- 420 If not (118 = survey month or 119 = since previous reference week) go to 500 If 103 = 1, go to 423 Before ... started working at [name of main job], had he/she ever worked at a job or business [not counting the other [job/business] he/she also works at now]? No, go to 500
- 421 When did ... last work at that job or business?

 If prior to month preceding this survey, go to 500

 If this survey month, go to 423
- 422 Was that before or after Sunday, [date of Sunday following last reference week]?

 Before, go to 500
- 423 What was the main reason ... stopped working at that [job/business]?

 If not "Lost job or laid off", go to 425
- 424 Can you be more specific about the main reason for ...'s job loss?
- 425 If 103 = 1, go to 500
 At that job or business, did ... usually work more or less than 30 hours per week?
 Go to 500

SCHOOL ATTENDANCE

- 500 If age > 64, go to END Last week, was ... attending a school, college or university? No, go to 520
- 501 Was ... enrolled as a full-time or part-time student?
- 502 What kind of school was this? Go to 520

SUMMER STUDENT CONTENT

- 520 If survey month not May thru August, END
 If age not 15 to 24, END
 If subsequent and PREVIOUS-520 = "no", END
 If subsequent and PREVIOUS 520 = "yes", go to 521
 Was ... a full-time student in March of this year?
 No, END
- 521 Does ... expect to be a full-time student this fall? END

QUESTIONNAIRE DE L'ENQUÊTE SUR LA POPULATION ACTIVE : VERSION DE 1997

Renseignements démographiques

MÉNAGE

- 10 Bonjour, mon nom est ... de Statistique Canada. Je vous appelle dans le cadre de l'Enquête sur la population active.
- 11 Préférez-vous être interviewé(e) en français ou en anglais?

Si c'est la première entrevue, passez à 12 Autrement, passez à 20

- 12 Confirmez l'adresse de liste.
- 13 Choisissez le genre de logement.
- 14 Quelle est votre adresse postale exacte?
- 15 Quels sont les noms des personnes qui demeurent habituellement dans ce logement? (Commencez par les adultes qui ont la responsabilité des soins ou la charge de la famille)
- 16 Y a-t-il quelqu'un qui réside temporairement ici? Ajoutez une personne sauf si elle a une résidence habituelle ailleurs.
- 17 Y a-t-il habituellement d'autres personnes qui habitent ici mais qui sont présentement parties à l'école, à l'hôpital ou ailleurs? Passez à 30
- 20 Demeurez-vous toujours dans le même logement que le mois dernier?
- 21 Les personnes suivantes demeurent-elles encore dans ce logement?

Pour corriger la composition du ménage, sélectionnez un nom et appuyez sur ENTER. Passez à 21A si un membre est sélectionné Autrement, passez à 22 si F12 est sélectionné

21A Est-ce que ...

Est actuellement un membre du ménage N'est plus un membre du ménage Est décédé(e)

22 Y a-t-il quelqu'un d'autre qui demeure présentement dans ce logement?

INDIVIDUS

30 Choisissez un membre et appuyez sur ENTER pour inscrire ou mettre à jour les données démographiques. Lorsque l'information est exacte, appuyez sur F12 pour continuer l'interview.

- 31 Quelle est la date de naissance de ...?
- 32 ... était donc âgé(e) de [âge] ans, samedi dernier. Est-ce exact?

 Oui, passez à 34

 Non, passez à 33
- 33 Quel est l'âge de ...?
- 34 Inscrire le sexe de
- 35 Quel est l'état matrimonial de ...?
- 36 Inscrire l'unité familiale de ...: A à Z. Assigner la même lettre à toutes les personnes unies par les liens du sang, du mariage ou de l'adoption.
- 37 Déterminez une personne de référence pour la famille et sélectionnez le lien unissant ... à cette personne. La personne de référence devrait être un adulte ayant la responsabilité des soins ou la charge de la famille.
- 38 Quel est le plus haut niveau d'études primaires ou secondaires que ... a achevé?
- 39 ... a-t-il (elle) obtenu un diplôme d'études secondaires?
- 40 ... a-t-il (elle) suivi tout autre cours pouvant mener à l'obtention d'une attestation, d'un certificat ou d'un diplôme décerné par un établissement d'enseignement? Non, passez à 30
- 41 Quel est le plus haut certificat ou diplôme que ... a obtenu?

Passez à 30 afin de remplir l'information démographique pour tous les membres du ménage. Lorsque terminé, passez à 50.

FORCES ARMÉES

50 Y a-t-il dans ce ménage un membre à temps plein des forces armées régulières?

Choisissez un membre et appuyez sur ENTER pour changer la réponse indiquée.

Passez à 50A si un membre est sélectionné

Autrement, passez à 60 si F12 est sélectionné

- 50A ... est-[il/elle] un membre à temps plein des Forces armées régulières?
- 60 Ce logement appartient-il à un membre de ce ménage? Si loué, répondez aux questions sur le loyer et revenez. PASSEZ À LA COMPOSANTE SUR LA POPULA-TION ACTIVE POUR CHAQUE PERSONNE ÂGÉE DE 15 ANS OU PLUS N'ÉTANT PAS MEMBRE DES FORCES ARMÉES RÉGULIÈRES

Renseignements sur la population active

VOIES

- Occupé(e), au travail
- 2 Absent(e) du travail
- 3 Mise à pied temporaire
- 4 À la recherche d'emploi
- 5 Emploi devant commencer à une date future
- Inactif(ve), capable de travailler
- 7 Inactif(ve), incapacité permanente

LIEN AUTRAVAIL

100 La majorité des questions suivantes ont trait aux activités de ... la semaine dernière, c'est-à-dire la semaine du dimanche [date] à samedi dernier [date]. La semaine dernière, ... a-t-[il/elle] travaillé à un emploi ou à une entreprise? (peu importe le nombre d'heures) Oui, VOIE = 1, passez à 102

Non, passez à 101 Incapacité permanente, VOIE = 7, passez à 104

- 101 La semaine dernière, ... avait-[il/elle] un emploi ou une entreprise dont [il/elle] s'est absenté(e)? Non, passez à 104
- 102 avait-[il/elle] plus d'un emploi ou plus d'une entreprise la semaine dernière? Non, passez à 110
- 103 Était-ce dû à un changement d'employeur? Passez à 110

LIEN À L'EMPLOI PRÉCÉDENT

- 104 ... a-t-[il/elle] déjà travaillé à un emploi ou à une entreprise?

 Non, passez à 170
- 105 Quand a-t-[il/elle] travaillé la dernière fois?

 Si interview subséquente et pas de changement à 105 et VOIE PRÉCÉDENTE = 3, passez à 131

 Si interview subséquente et pas de changement à 105 et VOIE PRÉCÉDENTE = 4 à 7, passez à 170

 Si pas durant la dernière année, passez à 170

 Si pas le mois dernier et VOIE = 7, passez à 131

 Si pas le mois dernier et VOIE 7, passez à 110
- 106 Était-ce avant ou après le dimanche [date suivant la dernière semaine de référence]?
 Si VOIE = 7, passez à 131, autrement passez à 110

DESCRIPTION DE L'EMPLOI

110 Je vais maintenant vous poser quelques questions sur le [nouvel] emploi ou [la nouvelle] entreprise [de .../où ... travaille habituellement le plus grand nombre d'heures]. ... était-[il/elle] employé(e) ou travaillait-[il/elle] à son compte?

Si pas «à son compte», passez à 114

- 111 ... avait-[il/elle] une entreprise constituée en société?
- 112 ... avait-[il/elle] des employés?
- 113 Quel était le nom de l'entreprise de ...?

 Passez à 115
- 114 Pour qui ... travaillait-[il/elle]?
- 115 De quel genre d'entreprise, d'industrie ou de service s'agissait-il?
- 116 Ouel genre de travail ... faisait-[il/elle]?
- 117 Quelles étaient les activités ou fonctions les plus importantes de ...?
- 118 Quand a-t-[il/elle] commencé à travailler? Si pas le mois dernier, passez à 130
- 119 Était-ce avant ou après le dimanche [date suivant la dernière semaine de référence]? Passez à 130

ABSENCE - SÉPARATION

130 Si VOIE = 1, passez à 150
Si 101 = Non, passez à 131
Quelle est la raison principale pour laquelle ... s'est absenté(e) du travail la semaine dernière?
Mise à pied temporaire, passez à 134
Mise à pied saisonnière, passez à 136
Travail occasionnel, passez à 137
Autrement, Occupé(e) mais absent(e), VOIE = 2, passez à 150

- 131 Quelle est la raison principale pour laquelle ... a cessé de travailler à [cet emploi/cette entreprise]? Si pas «Perdu son emploi ou mis (e) à pied», passez à 137
- 132 Pourriez-vous préciser la raison principale pour laquelle ... a perdu son emploi?

 Si VOIE = 7, passez à 137

 Si pas «conjoncture économique», passez à 137
- 133 Si date où a travaillé pour la dernière fois est il y a plus d'un an, passez à 137 ... prévoit-[il/elle] retourner à cet emploi? Non ou «incertain», passez à 137
- 134 L'employeur de ... lui a-t-il donné une date de retour au travail? Oui, passez à 136
- 135 ... a-t-[il/elle] des raisons de croire qu'[il/elle] sera rappelé(e) au travail d'ici 6 mois?
- 136 La semaine dernière, depuis combien de semaines ... était-[il/elle] mis(e) à pied?
 Si 130 = «mise à pied saisonnière» ou absent (e) pendant plus d'un an, passez à 137
 Autrement, VOIE = 3, passez à 137

137 ... travaillait-[il/elle] habituellement plus, ou moins de 30 heures par semaine?

Si VOIE = 3, passez à 190

Autrement, passez à 170

HEURES DE TRAVAIL (EMPLOI PRINCIPAL)

- 150 Les questions suivantes portent sur les heures de travail de ... à [nom de l'emploi principal]. [En ne tenant pas compte des heures supplémentaires,] le nombre d'heures de travail [payées] de ... varie-t-il d'une semaine à l'autre?

 Oui, passez à 152
- 151 [En ne tenant pas compte des heures supplémentaires,] combien d'heures [payées] ... travaille-t-[il/elle] par semaine?

 Si VOIE = 2, passez à 158

 Si pas un(e) employé(e), passez à 157. Autrement, passez à 153
- 152 [En ne tenant pas compte des heures supplémentaires,] combien d'heures [payées] en moyenne ... travaille-t-[il/elle] habituellement par semaine? Si VOIE = 2, passez à 158
 Si pas un(e) employé(e), passez à 157
- 153 La semaine dernière, combien d'heures ... était-[il/elle] absent(e) de son travail en raison de vacances, de maladie ou de toute autre raison? (N'oubliez pas que [jour férié] était la semaine dernière) 0, passez à 155
- 154 Quelle est la raison principale de cette absence?
- 155 La semaine dernière, combien d'heures supplémentaires payées a-t-[il/elle] travaillé à cet emploi?
- 156 La semaine dernière, combien d'heures supplémentaires non payées a-t-[il/elle] travaillé à cet emploi?
- 157 Si (employé(e) et 150 = non) heures effectivement travaillées = 151 153 + 155 + 156, passez à 158

 Au total, combien d'heures ... a-t-[il/elle] travaillées la semaine dernière à [nom de l'emploi principal]?
 (N'oubliez pas que [jour férié] était la semaine dernière)
- 158 Si 151 ou 152 > 29 et VOIE = 2, passez à 162 Si 151 ou 152 > 29 et VOIE = 1, passez à 200 ... voudrait-[il/elle] travailler 30 heures ou plus par semaine [à un seul emploi]? Oui, passez à 160
- 159 Quelle est la raison principale pour laquelle ... ne veut pas travailler 30 heures ou plus par semaine [à un seul emploi]? Si VOIE = 2, passez à 162; autrement, passez à 200
- 160 Quelle est la raison principale pour laquelle ... travaille habituellement moins de 30 heures par semaine [à son emploi principal]?

 Si ni «conjoncture économique», ni «n'a pu trouvé un travail à temps plein», et VOIE = 2, passez à 162

 Si ni «conjoncture économique», ni «n'a pu trouvé un travail à temps plein», et VOIE = 1, passez à 200

161 Au cours de la période de 4 semaines terminée samedi dernier le [date], ... a-t-[il/elle], à un moment donné, cherché du travail à temps plein?

Si VOIE = 2, passez à 162

Autrement, passez à 200

ABSENCE

- 162 La semaine dernière, depuis combien de semaines ... avait-[il/elle] été absent(e) du travail de façon continue? Si ni employé(e), ni ayant une entreprise constituée en société, passez à 200
- 163 ... reçoit-[il/elle] un salaire ou un traitement de son [employeur/entreprise] pour ses absences de la semaine dernière? Passez à 200

RECHERCHE DE TRAVAIL - EMPLOI DEVANT COMMENCER À UNE DATE FUTURE

170 Si VOIE = 7, passez à 500

Au cours de la période de 4 semaines terminée le samedi [date], ... a-t-[il/elle] fait quoi que ce soit pour trouver du travail?

Non, âge > 64 et VOIE = 6, passez à 420

Non et âge < 65, passez à 174

Oui, VOIE = 4

- 171 Au cours des 4 dernières semaines, qu'a fait ... pour trouver du travail? ... a-t-iil/ellel fait autre chose pour trouver du travail?
- 172 La semaine dernière, depuis combien de semaines cherchait-[il/elle] du travail? (depuis la date de la dernière iournée de travail)
- 173 Quelle était l'activité principale de ... avant qu'[il/elle] commence à chercher du travail?

 Passez à 177
- 174 La semaine dernière, ... avait-[il/elle] un emploi devant débuter à une date précise?

 Non, VOIE = 6, passez à 176
- 175 ... va-t-[il/elle] commencer à travailler à cet emploi avant ou après le dimanche [date 4 semaines plus tard]?

 Avant, VOIE = 5, passez à 190
 À ou après, VOIE = 6, passez à 420
- 176 ... voulait-[il/elle] un emploi la semaine dernière? Non, passez à 420
- 177 ... voulait-[il/elle] un emploi de plus, ou moins de 30 heures par semaine?
- 178 Si VOIE = 4, passez à 190 Quelle est la raison principale pour laquelle ... n'a pas cherché du travail la semaine dernière? Si pas «Croyait qu'il n'y avait pas de travail», passez à 420 Autrement, passez à 190

DISPONIBILITÉ

- 190 ... aurait-[il/elle] pu travailler la semaine dernière [s'il/si elle] avait été rappelé(e)/si un emploi convenable lui avait été offert]? Oui, passez à 400
- 191 Quelle est la raison principale pour laquelle ...
 n'était pas disponible pour travailler la semaine
 dernière?
 Passez à 400

GAINS - SYNDICAT - PERMANENCE

- 200 Si pas un(e) employé(e) (à l'emploi principal), passez à 300
 - Si interview subséquente et pas de changement à 110, 114, 115, 116, 117, 118, passez à 260
 - Je voudrais maintenant vous posez quelques courtes questions sur les gains de ... à [nom de l'entreprise]. ... est-[il/elle] payé(e) à l'heure?
- 201 ... reçoit-[il/elle] habituellement des pourboires ou des commissions?

 Si 200 = non, passez à 204
- 202 [En incluant les pourboires et les commissions], quel est le salaire horaire de ...?

 Passez à 220
- 204 Pour vous, quelle est la manière la plus facile de nous dire le salaire ou le traitement de ... [y compris les pourboires et les commissions], avant impôt et autres déductions? Sous forme de gains annuels, mensuels, hebdomadaires ou autre?
- 205 [En tenant compte des pourboires et des commis-
- à sions, quel est le salaire ou le traitement [hebdoma-
- 209 daire/aux deux semaines/bimensuel/mensuel/annuel] de ..., avant impôt et autres déductions?
- 220 ... est-[il/elle] syndiqué(e) à [nom de l'emploi principal]?

 Oui, passez à 240
- 221 ... est-[il/elle] couvert(e) par une convention collective ou par un contrat de travail négocié par un syndicat?
- 240 [L'emploi principal] de ... est-il permanent ou est-il d'une manière ou d'une autre non permanent? (p. ex., emploi saisonnier, temporaire, d'une durée déterminée, occasionnel) Permanent, passez à 260
- 241 De quelle manière l'emploi de ... n'est-il pas permanent?

 Passez à 260

TAILLE DE L'ÉTABLISSEMENT

- 260 Environ combien de personnes sont employées à l'endroit où ... travaille pour [nom de l'employeur]? Est-ce moins de 20, entre 20 et 99, entre 100 et 500, ou plus de 500? Si pas septembre ou novembre, passez à 300
- 261 [L'employeur de ... a-t-[il/elle] des opérations à plusieurs endroits?

 Non, ou 260 = «plus de 500», passez à 300
- 262 Au total, environ combien de personnes travaillent pour cet employeur à ces différents endroits? Est-ce moins de 20, entre 20 et 99, entre 100 et 500, ou plus de 500? Passez à 300

CATÉGORIE DE TRAVAILLEUR - HEURES À L'AUTRE EMPLOI

- 300 Si 102 = non, passez à 400
 J'ai maintenant quelques questions sur l'[autre/ancien]
 emploi ou l'[autre/ancienne] entreprise de Était-[il/
 elle] employé(e) ou travaillait-[il-elle] à son compte?
 Si pas «à son compte», passez à 320
- 301 ... avait-[il/elle] une entreprise constituée en société?
- 302 ... avait-[il/elle] des employés?
- 320 [En ne tenant pas compte des heures supplémentaires,] combien d'heures payées par semaine ... travaill[e-t-/ ait-][il/elle] habituellement à [cet emploi/cette entreprise]? Si VOIE = 2, passez à 400
- 321 Au total, combien d'heures ... a-t-[il/elle] travaillées la semaine dernière à [cet emploi/cette entreprise]?

 Passez à 400

RECHERCHE D'EMPLOI (MISE À PIED TEMPORAIRE)

400 Si VOIE 3, passez à 420

Au cours des 4 semaines terminées samedi dernier le [date], ... a-t-[il/elle] cherché un emploi auprès d'un autre employeur?

Passez à 420

SÉPARATION PRÉCÉDENTE

- 420 Si ni 118 = mois d'enquête, ni 119 = depuis la dernière semaine de référence, passez à 500. Si 103 = 1, passez à 423

 Avant que ... commence à travailler à [nom de l'employeur], avait-[il/elle] déjà travaillé à un emploi ou à une entreprise [en ne tenant pas compte de [l'autre emploi/l'autre entreprise] où ... travaille en ce moment]?

 Non, passez à 500
